

## Release Details

- Driver: Intel NPU (Neural Processing Unit) Driver – Windows\*
- Driver Version: 32.0.100.2820
- Date: September 24, 2024

## Notes

- Support for OpenVINO 2024.3.
- Added Intel® Core™ Ultra Processors (V-SKUs) support, formerly codenamed Lunar Lake.
- The name displayed for the NPU device in Microsoft Windows® Device Manager and Task Manager is aligned with the NPU brand name: Intel® AI Boost.

## Fixed Issues

- Microsoft Co-pilot performance and accuracy improvements over the previous release.
- Enable and optimize Lenovo View Video enhancer use case:
  - Fix compilation issues associated with Magix ISV, specifically the colorization features and depth estimation, have been resolved.

## Known Issues

- No known issues.

## Supported Platform

- Intel® Core™ Ultra Processors (V-SKUs), formerly codenamed as Lunar Lake
- Intel® Core™ Ultra Processors (Series 1), formerly codenamed as Meteor Lake

## Operating System Support

Operating System	Version	Details
Microsoft Windows® 11 64-bit	September Update (22H2)	
	October Update (22H2)	
	October Update (23H2)	

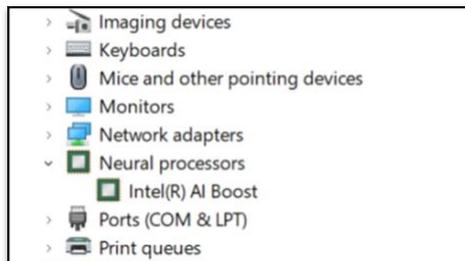

**NOTE:** NPU will not support workloads on Windows\* 10. Disable the NPU device from BIOS for Windows 10.

## AI Frameworks Support

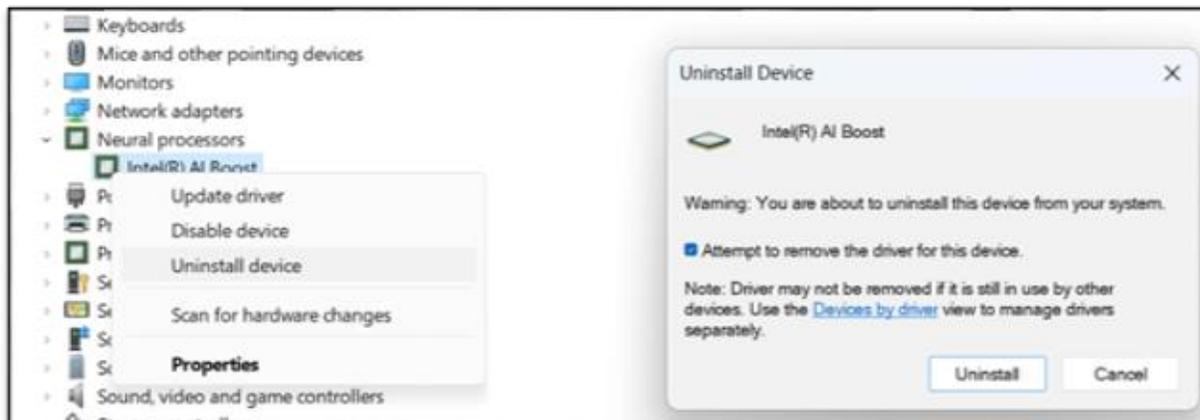

Framework	Version
OpenVINO	OpenVINO 2024.3
DirectML	Preview

## How to Install / Update the NPU Driver

1. **Check if an NPU driver is already installed on your device.** Right click on Windows start button and select *Device Manager*. Check if *Intel(R) AI Boost* is visible under *Neural processors*.

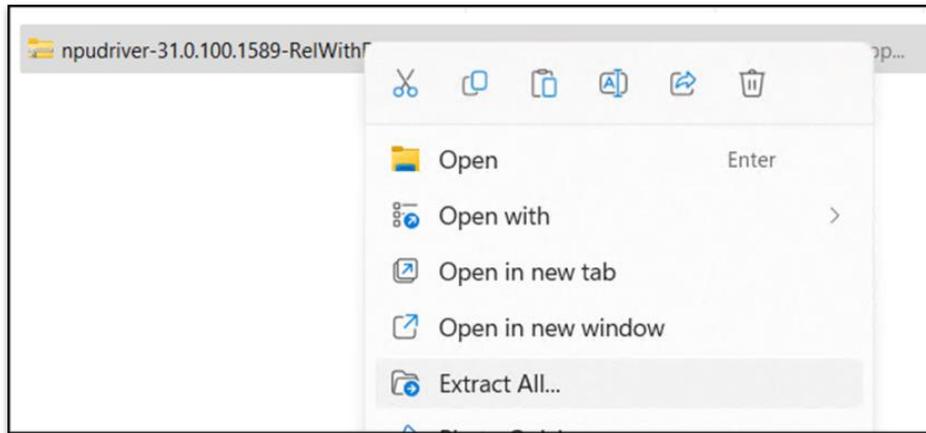

2. **If an NPU driver is installed, you need to uninstall it.**
  - a. In Device Manager window, right click on the *Intel(R) AI Boost* and select *Uninstall Device*.
  - b. When the *Uninstall Device* window appears, select the *Attempt to remove the driver for this device* checkbox and click on the *Uninstall* button.

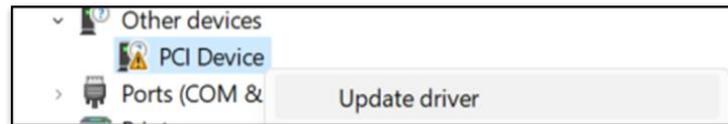

3. Once the device is uninstalled, it's time to **install the new driver version**. Download the latest NPU driver from Intel Download Center.
4. **Unpack the zip driver package downloaded from Intel Download Center.** To unpack the .zip driver file, right click the file and Extract All -> Extract.

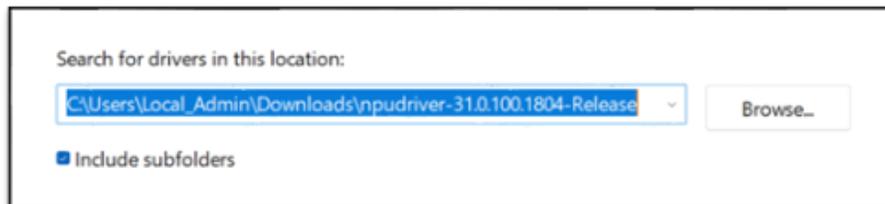

# Intel NPU Driver – Release Notes

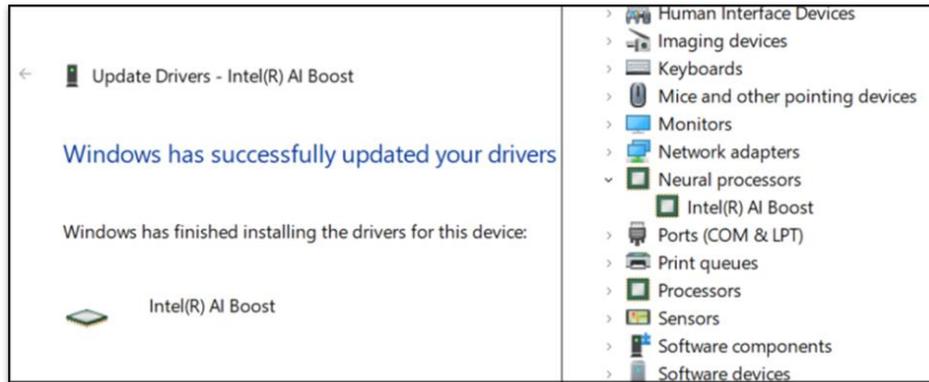

5. **Install the new NPU driver.** After unpacking, go to *Device Manager* and find *PCI Device* under *Other devices*. Right click it and select *Update Driver*.

6. In the new Windows that appears, click *Browse my computer for drivers*. Click on *Browse* button and navigate to the location where the unpacked driver was saved.

7. After setting the correct location tick the **Include Subfolders** checkbox and click Next. The driver will now install.
8. If the driver installed correctly, you should see the following window saying, "*Windows has successfully updated your drivers*" and the Device Manager should display your *Intel(R) AI Boost driver* under *Neural processors*.

**Note:** For issues with manual installation, please contact [Intel support](#).
