

### Release Details

- Driver: Intel NPU (Neural Processing Unit) Driver – Windows\*
- Driver Version: 32.0.100.3714
- Date: February 3rd, 2025

### Notes

- Support for OpenVINO 2024.5
- Reboot directive enabled for Lunar Lake. System will trigger a reboot after NPU driver installation
- Support for production release of Copilot+ experiences that were available through Windows Insider Program starting in December 2024
- The name displayed for the NPU device in Microsoft Windows® Device Manager and Task Manager is aligned with the NPU brand name: Intel® AI Boost.

### Fixed Issues

- Microsoft CoPilot+\* compile time and memory footprint improved from 32.0.100.3104
- Resolved instability issue seen in memory constraint workload reported in Unified Driver 48 version 32.0.100.3104 Supports basic driver functionality, such as power management, not for running NPU workloads

### Supported Platform

- Lunar Lake: [Intel® Core™ Ultra Processors \(Series 2\)](#)
- Meteor Lake: [Intel® Core™ Ultra Processors \(Series 1\)](#)
- Arrow Lake: [Intel® Core™ Ultra Processors \(Series 2\)](#)

### Operating System Support

Operating System	Version	Details
Microsoft Windows® 11 64-bit	September Update (22H2)	
	October Update (22H2)	
	October Update (23H2)	
	2024 Update (24H2)	
Microsoft Windows® 10 64-bit	2024 Update (22H2)	Supports basic driver functionality, such as power management, not for running NPU workloads

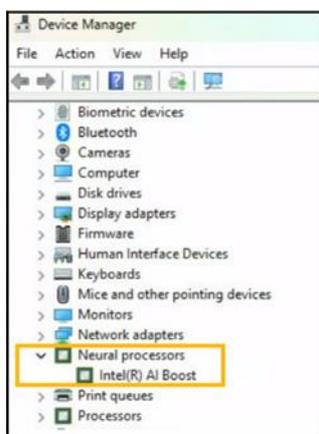

**NOTE:** NPU will not support workloads on Windows\* 10. Disable the NPU device from BIOS for Windows 10.

### AI Frameworks Support

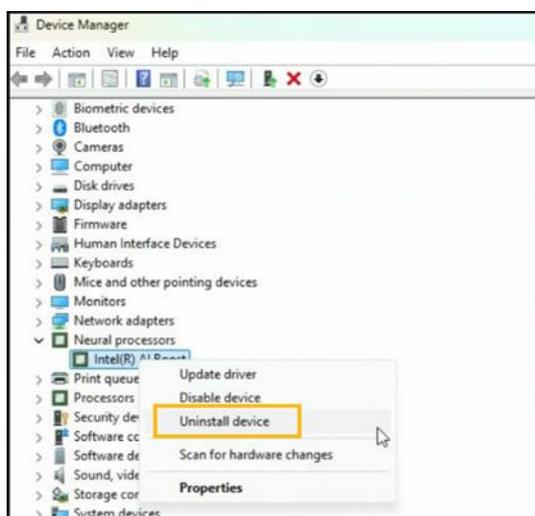

Framework	Version
OpenVINO	OpenVINO 2024.5
DirectML	Preview

### How to Install / Update the NPU Driver

1. **Check if an NPU driver is already installed on your device.** Right click on Windows\* start button and select *Device Manager*. Check if *Intel(R) AI Boost* is visible under *Neural processors*.

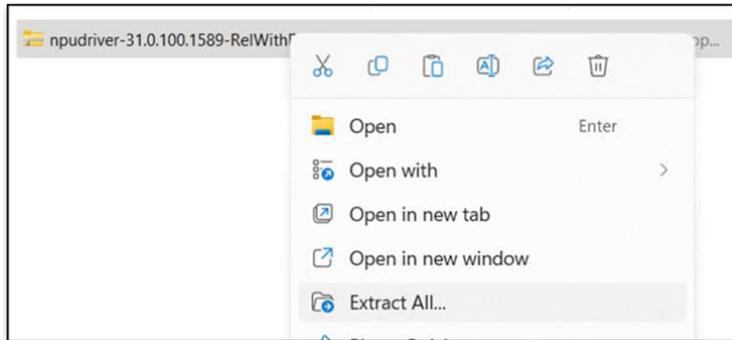

2. **If an NPU driver is installed, you need to uninstall it.**
  - a. In *Device Manager* window, right click on the *Intel(R) AI Boost* and select *Uninstall Device*.
  - b. When the *Uninstall Device* window appears, select the *Attempt to remove the driver for this device* checkbox and click on the *Uninstall* button.

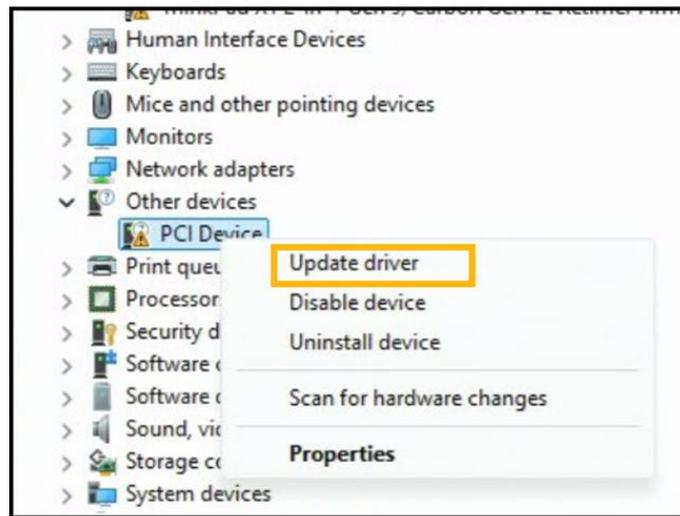

3. Once the device is uninstalled, it's time to **install the new driver version**. Download the latest NPU driver from Intel Download Center.
4. **Unpack the zip driver package downloaded from Intel Download Center**. To unpack the .zip driver file, right click the file and Extract All -> Extract.

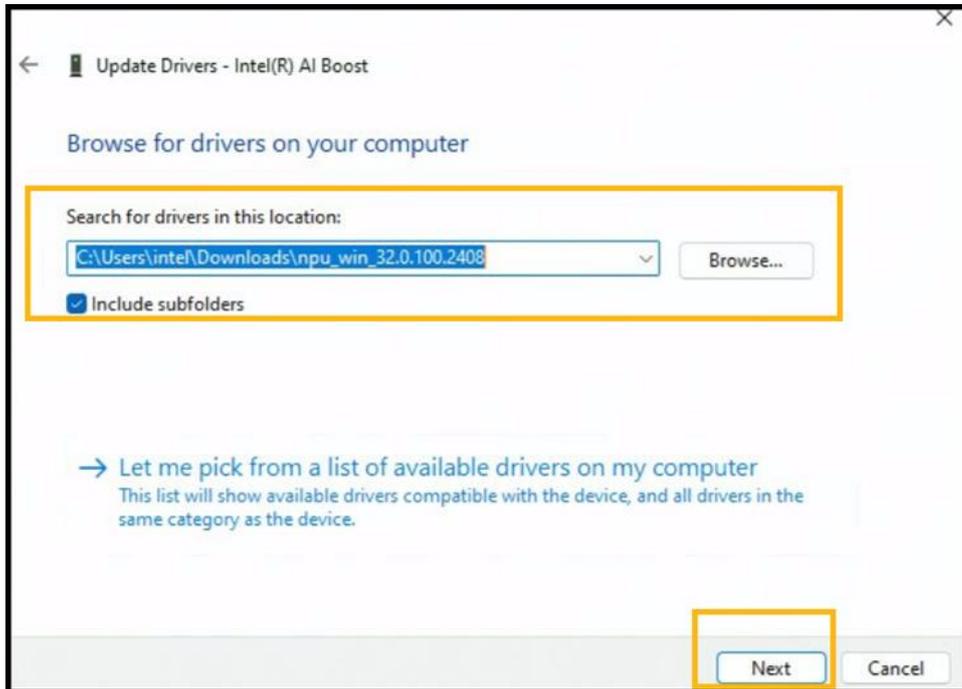

5. **Go to Device Manager** and Scan for Hardware Changes, by clicking on  icon located at the top menu. This will reveal *Other devices*.
6. **Install the new NPU driver**. After unpacking, go to *Device Manager* and find *PCI Device* under *Other devices*. Right click it and select *Update Driver*.

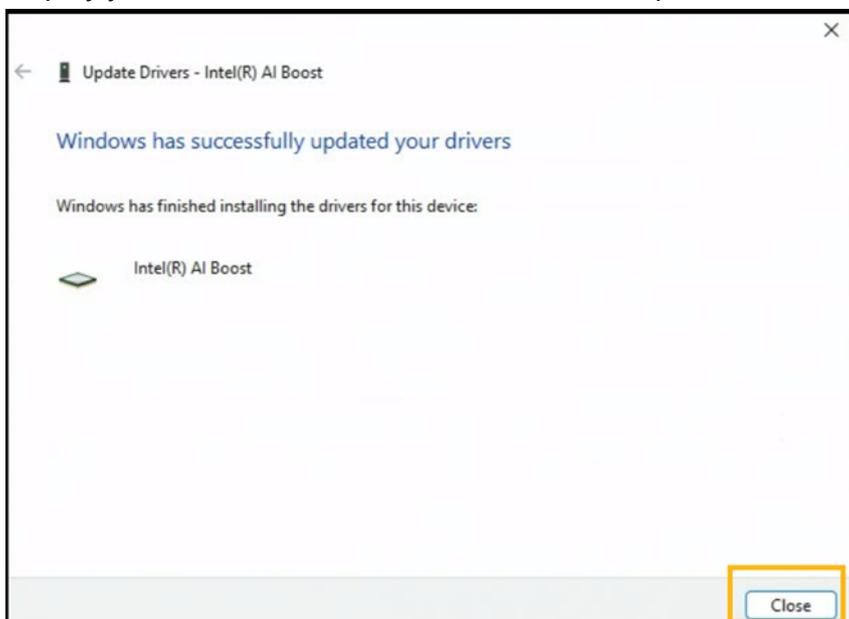

7. In the new Windows that appears, click *Browse my computer for drivers*. Click on *Browse* button and navigate to the location where the unpacked driver was saved.

8. After setting the correct location tick the **Include Subfolders** checkbox and click Next. The driver will now install.

9. If the driver installed correctly, you should see the following window saying, "Windows has successfully updated your drivers" and the Device Manager should display your *Intel(R) AI Boost* driver under *Neural processors*.

**Note:** For issues with manual installation, please contact [Intel support](https://www.intel.com/support).
